

# Journal Rating AIDEA 2015-2016

## in collaborazione con le società scientifiche dell'area economico-aziendale (ADEIMF, AISME, ASSIOA, SIDREA, SISR, SIM, SIMA)

25 febbraio 2016

### Premessa: gli obiettivi del Journal Rating

Nel 2014 il Consiglio Direttivo AIDEA ha affidato la revisione del proprio Journal Rating 2012 a un gruppo di lavoro composto dai delegati delle società scientifiche rappresentative dei diversi settori delle discipline economico-aziendali (ADEIMF, AISME, ASSIOA, SIDREA, SIM, SIMA, SISR)<sup>1</sup> e coordinato da AIDEA stessa.

Si è convalidato, ancora una volta, l'obiettivo dei precedenti Journal Rating (2007, 2009 e 2012): mettere a disposizione della comunità accademica economico-aziendale, nonché delle strutture e istituzioni in cui la stessa si raccoglie e opera, uno strumento utile per l'indirizzo e la valutazione della attività scientifica dei singoli studiosi e delle strutture universitarie.

La classificazione delle riviste internazionali nel Journal Rating, data la natura non bibliometrica delle discipline aziendali, non si sostituisce in alcun modo alla valutazione dei prodotti di ricerca ivi contenuti. Essa va intesa come supporto a processi di *informed peer review*, ovvero come informazione utile a stabilire la collocazione editoriale dei prodotti stessi.

---

<sup>1</sup> Associazione dei Docenti di Economia degli Intermediari e dei Mercati Finanziari (ADEIMF), Accademia Italiana di Scienze Merceologiche (AISME), Associazione Italiana di Organizzazione Aziendale (ASSIOA), Società Italiana dei Docenti di Ragioneria e di Economia Aziendale (SIDREA), Società Italiana Marketing (SIM), Società Italiana di Management (SIMA), Società Italiana di Storia della Ragioneria (SISR).

## Approccio metodologico adottato per il Journal Rating AIDEA 2015-2016

Il gruppo di lavoro si è diviso in due sottogruppi, uno dedicato al rating delle riviste internazionali, l'altro a quello delle riviste italiane.

Lo spirito comune è stato quello di mantenere un approccio omogeneo, individuando dei criteri **trasparenti, ripercorribili e oggettivi** che potessero consentire di:

- a) **classificare** le riviste pertinenti grazie ad un algoritmo che desse luogo ad un punteggio sintetico rappresentativo delle diverse informazioni raccolte dal gruppo di lavoro;
- b) **utilizzare**, data la natura non bibliometrica dei settori disciplinari aziendali, anche criteri non bibliometrici;
- c) **aggiornare** periodicamente (tendenzialmente ogni due anni) il journal rating, mantenendo invariato l'approccio metodologico complessivo;
- d) **escludere** le riviste non pertinenti alle discipline economico-aziendali;
- e) **coinvolgere** le società scientifiche in diverse fasi del processo, responsabilizzandole pienamente;
- f) **bilanciare**, pur all'interno del citato approccio omogeneo, alcune evidenti differenze presenti tra i diversi settori disciplinari, nonché tra riviste internazionali e nazionali

## Rating delle riviste internazionali: le fasi

L'approccio seguito ha preso avvio dalle singole società scientifiche, che hanno contribuito a generare un elenco di riviste pertinenti in base ai contenuti pubblicati e agli *aims and scope* delle singole riviste.

Le società scientifiche, attraverso un metodo partecipato e strutturato (nella maggioranza dei casi è stata predisposta un'apposita scheda contenente le informazioni essenziali per valutare la rilevanza della rivista candidata), hanno raccolto presso i propri associati le segnalazioni delle riviste afferenti alle singole discipline. Il risultato è poi stato scremato e validato dai Consigli Direttivi delle stesse società scientifiche che hanno trasmesso ad AIDEA la lista delle riviste afferenti.

Su questa base è stata costituita una lista unica di oltre 2.200 riviste, per le quali il gruppo di lavoro ha provveduto a raccogliere una serie di informazioni da fonti bibliometriche e non, ovvero<sup>2</sup>:

- a) IF (impact factor) ISI degli ultimi 3 anni (2012-13-14);
- b) indice SJR presente in Scimago;
- c) H index presente in Scimago;
- d) Rating Academic Journal Guide Association of Business Schools ABS;
- e) Classificazione "subject category" e quartile Scimago (scegliendo la migliore tra quelle presenti).

Il quinto criterio è stato utilizzato solamente per l'analisi di afferenza che il gruppo di lavoro ha effettuato, anche se la base principale per questa è stata la segnalazione di afferenza effettuata dalle società scientifiche. Infatti, laddove nessuna società scientifica avesse indicato una rivista all'interno della propria selezione, questa è stata considerata al di fuori dei confini disciplinari, salvo ripensamenti da parte delle stesse società scientifiche.

L'attività di scrematura ha portato la lista ad una significativa contrazione, con un numero di riviste da classificare pari a 1.463.

Alle riviste da classificare è stato applicato un algoritmo che ha considerato le prime 4 categorie di informazioni indicate sopra e che ha portato alla definizione di 4 classi di merito: A, B, C e D. I dettagli di metodo vengono chiariti nel punto successivo.

Il risultato di questa prima classificazione, a cui sono stati applicati alcuni correttivi (vedi punto successivo) è stato condiviso con la comunità scientifica. Il rating AIDEA 2015 in bozza è stato pubblicato sul sito [www.accademiaaidea.it](http://www.accademiaaidea.it) in data 12 novembre 2015 e nelle

---

<sup>2</sup> Informazioni estratte da luglio a ottobre 2015 da:

- ISI Web of Knowledge, Journal Citation Report, in prima battuta JCR Social Sciences Edition, integrato con JCR Science Edition (impact factor ultimo 3 anni)
- Scimago Journal Ranking (indice SJR, H index, quartile e subject category)
- Academic Journal Guide, Association of Business Schools <http://charteredabs.org/academic-journal-guide-2015-view> (informazione non bibliometrica)

settimane successive si sono raccolte segnalazioni di refusi e valutate possibili estensioni della lista proposte da esponenti della comunità, direttamente ad AIDEA o tramite le società scientifiche disciplinari. A seguito di questo fine tuning, il numero complessivo di riviste del rating AIDEA 2015-16 è passato a 1.513.

Il risultato della classificazione e del fine tuning, condiviso con tutte le società scientifiche disciplinari, è confluito nel rating AIDEA 2015-16.

## **Rating riviste internazionali . dettagli di metodo**

L'algoritmo di classificazione deriva dalla somma di 4 indicatori, i primi 3 bibliometrici e l'ultimo non bibliometrico:

- a) IF (impact factor) ISI degli ultimi 3 anni (2012-13-14);
- b) indice SJR presente in Scimago;
- c) H index presente in Scimago;
- d) Rating Academic Journal Guide Association of Business Schools ABS;

Nell'elaborare l'algoritmo di classificazione si è utilizzato un criterio che consentisse un primo bilanciamento nelle differenze esistenti tra le riviste di riferimento per i diversi settori disciplinari. Si è stabilito che il massimo punteggio possibile degli indicatori fosse quello collocato sul 70° percentile di ogni indicatore. Si è così definito che per ognuno dei 4 indicatori selezionati le riviste prendessero il punteggio massimo (=1), se presentavano:

- a) IF factor ISI medio degli ultimi 3 anni  $> 0,58$
- b) SJR  $> 0,61$
- c) H index  $> 26$
- d) ABS  $> 1$ . Quest'ultimo criterio, non bibliometrico, è apparso importante anche per caratterizzare meglio le riviste che sono internazionalmente riconosciute come *core* per le discipline economico-aziendali.

Per i valori inferiori al massimo è stato calcolato poi il valore effettivo normalizzato (ovvero il punteggio ottenuto diviso il livello definito come massimo).

In tal modo si è ottenuto un punteggio sintetico per tutte le riviste da valutare.

A questo punto per definire le 4 classi del rating A, B, C e D è stato suddiviso l'universo delle riviste di riferimento in 4 gruppi, usando la suddivisione in quartili come principio guida e arrotondando poi, laddove necessario, le soglie per l'accesso alla classe di rating.

Nello specifico si è adottato il valore del 75° percentile per la classe A (soglia di punteggio = 3), il punteggio 0 per la classe D e un valore di una soglia intermedia pari a 1 (un valore arrotondato attorno al 50° percentile del sottoinsieme B+C, pari esattamente a 1,12) per tracciare la demarcazione tra la classe B e la classe C. Più schematicamente:

- a) classe A    punteggio  $\geq 3$
- b) classe B     $3 > \text{punteggio} \geq 1$
- c) classe C     $1 > \text{punteggio} > 0$
- d) classe D = 0

Le soglie identificate attraverso i parametri oggettivi identificano anche sotto il profilo qualitativo differenti classi di rating. Più nello specifico:

#### **Fascia A, punteggio tot $\geq 3$**

Vi accedono i journal più influenti nel dibattito scientifico internazionale, quelli che più frequentemente vengono citati in lavori accolti su riviste ISI e Scopus e/o che ottengono almeno 2 stelle nella selezione ABS. Si tratta di top journal nel proprio campo di studi, con distribuzione globale. Altissima è la competizione tra gli autori per pubblicare su tali journal.

#### **Fascia B, punteggio tot $\geq 1$ e $< 3$**

Vi accedono ottimi journal con distribuzione internazionale / sovraregionale. Esercitano un significativo impatto sulla comunità scientifica. Alta è la competizione tra gli autori per pubblicare su tali journal.

#### **Fascia C, punteggio tot $< 1$ e $> 0$**

Si tratta di riviste scientifiche con buona reputazione, con riconoscimento internazionale (presenti almeno in Scopus). La fascia accoglie anche riviste in lingue diverse dall'inglese.

#### **Fascia D, punteggio 0**

Si tratta di riviste scientifiche presenti in repertori diversi da Scopus, ISI e non valutate nel rating ABS. I dati citazionali non sono direttamente confrontabili con quelli delle classi precedenti A B e C.

Al risultato ottenuto attraverso l'attribuzione dei punteggi sono stati apportati 3 correttivi:

- a) le riviste da poco tempo indicizzate su Scopus anche quando non raggiungevano il punteggio maggiore di 0, sono state comunque collocate in fascia C. Si tratta di un numero molto ristretto (pari a 17) che sono recentemente entrate in Scopus e quindi non hanno maturato indici particolarmente elevati nei dati ufficialmente pubblicati, ma che tuttavia rispondono ai criteri di diffusione internazionale richiesti per l'indicizzazione da parte di Scopus;
- b) per i due settori disciplinari (SECS-P/07 e SECS-P/11) che presentavano un numero di riviste in fascia A decisamente inferiore alla media, si è consentito di inserire in fascia A un numero limitato di riviste (rispettivamente 10 e 8 riviste) che si trovavano nella classificazione immediatamente al di sotto della soglia definita (di 3). Si tratta di un correttivo adottato in questa circostanza per consentire un bilanciamento (parziale rispetto alle differenze esistenti), all'interno della auspicata omogeneità di approccio tra le diverse discipline economico-aziendali. Il correttivo è stato applicato per quelle riviste i cui punteggi risultassero comunque superiori rispetto al 75° percentile della distribuzione calcolata sulla propria area di studi e che avessero ottenuto un rating ABS di almeno 2<sup>3</sup> e pertanto risultassero indiscutibilmente riconosciute a livello internazionale;
- c) coerentemente con la richiesta di revisione del giudizio sulle riviste scientifiche utilizzate ai fini ASN, presentata a Novembre 2014 e supportata da parere positivo di AIDEA, si è inserito il *Journal of Management and Governance* in fascia A, con un upgrade di una fascia rispetto al punteggio ottenuto. Il *Journal of Management and Governance* costituisce un riferimento imprescindibile per tutta la comunità scientifica che si riconosce in AIDEA. Il JMG nel corso degli anni ha gradualmente acquisito un ruolo di riferimento a livello internazionale attraverso la partecipazione attiva in Annual Conferences (Academy of Management - AoM, EURAM, European Accounting Association, American Accounting Association, Academy of International Business, European International Business Academy, Strategic Management Society). Il JMG è presente nel rating ABS, Q2 Scimago.

## Una novità: la disciplina Scienze Merceologiche nel Journal Rating AIDEA 2015-2016

La partecipazione al gruppo di lavoro di AISME, Accademia Italiana di Scienze Merceologiche, ha consentito di tracciare un quadro completo delle riviste di tutti i settori afferenti all'ambito aziendale, da 13B1 a 13B5. AISME ha preso parte attiva al gruppo di lavoro, assicurando l'inserimento nella lista AIDEA delle riviste aziendali che trattano tematiche coerenti con gli interessi di ricerca dei merceologi italiani, prevalentemente incentrati su ambiente e sostenibilità, agroalimentare, innovazione tecnologica, qualità e caratterizzazione delle merci. Si specifica che la selezione è stata effettuata sulla base della numerosità dei prodotti di ricerca presentati nella VQR 2004-2010. Esso tuttavia non è esaustivo e, pertanto, AISME potrà considerare dentro i propri confini disciplinari ulteriori riviste che trattino gli argomenti sopra citati. Inoltre AISME ha prodotto un elenco separato di riviste "tecniche" (all. 2). Su queste ultime AISME ha proposto dei criteri di valutazione specifici e separati, analogamente a quanto avvenuto nella ultima tornata di VQR 2004-2010.

---

<sup>3</sup> Unica eccezione Journal of Risk and Insurance con rating ABS = 1.

## Fase transitoria

Infine si è disciplinata la fase transitoria nel passaggio da un rating all'altro, considerando che la Comunità Scientifica ha fatto fino ad oggi affidamento sul rating AIDEA 2012 e che i tempi di pubblicazione sui journal internazionali portano con sé una notevole inerzia una volta effettuata la submission. Si è ritenuto, come per i precedenti rating AIDEA, prevedere una categoria di classificazione "phasing out" per quelle riviste che ottengono nell'edizione 2015-16 del Journal Rating AIDEA un rating inferiore al rating 2012. Si tratta di un numero tutto sommato limitato di riviste che scendono di categoria. Nello specifico:

- ✓ nessuna rivista passa da A a classi inferiori
- ✓ 4 riviste scendono da B a C
- ✓ 2 riviste scendono da B a D
- ✓ 37 riviste scendono da C a D

La classificazione "phasing out" consiste nel mantenimento, per un periodo di poco più di 1 anno, fino al 30 giugno 2017, della precedente migliore classificazione, indicandola con X(B) o X (C). A partire dal 1 luglio 2017 viene adottata per tutte le riviste la nuova classificazione.

## Verso i prossimi Journal Rating

Prima di presentare i risultati del rating delle riviste internazionali, si specificano alcune regole per i futuri aggiornamenti del rating AIDEA:

- Il rating verrà rivisto a cadenza biennale, dunque nel 2018 si darà avvio a un aggiornamento dei parametri e delle conseguenti classificazioni attribuite alle riviste, verificando la possibilità di mantenere invariati i criteri del presente rating.
- Da ottobre 2017 a dicembre 2017 i soci avranno facoltà di segnalare, tramite apposita scheda di richiesta, nuove riviste ai fini del possibile inserimento nel Journal Rating AIDEA 2018 (Scheda allegata: "Richiesta di inserimento di una nuova rivista nell'elenco delle riviste di pertinenza della disciplina Economia Aziendale").

## Rating riviste internazionali . i risultati

I risultati finali in termini di numerosità delle riviste sono sotto indicati:

classe	Nr riviste	percentuale
A	444	29%
B	369	24%
C	297	20%
D	360	24%
X (B) X (C)	43	3%
<b>totale</b>	<b>1.513</b>	<b>100%</b>

In allegato è riportato l'elenco completo delle riviste con il relativo rating attribuito.

Come si può osservare la distribuzione nelle diverse classi è abbastanza bilanciata. I criteri adottati possono altresì consentire di scegliere valori soglia differenti in relazione a specifiche esigenze.
